

JENNIFER PIWONSKI

FULL-STACK SOFTWARE ENGINEER

✉ jenniferpiwonski@gmail.com 🌐 sunnydayz77.github.io/ ☎ (313) 590-1495 🐦 JenniferPiwons1 in jenniferpiwonski/ 🔄 Sunnydayz77

As a public health researcher-turned-software developer, I built my career around patient care and navigating challenging situations. I leverage my patient-centered approach in my software development, providing a detail-oriented, analytical, and positive perspective around the applications I build and the teams with which I collaborate. Open to relocation.

SKILLS

TECHNICAL SKILLS: React, Javascript, HTML, CSS, Ruby on Rails, Express, NodeJS, Python, SQL, MongoDB, Mongoose, JWT Authentication, Heroku Deployment, MongoDB Atlas Deployment, Surge Deployment, Netlify Deployment, SPSS, NVIVO
LANGUAGES: English, Polish, German

PROJECTS

Weather Now App
December 2020

<https://github.com/Sunnydayz77/WeatherNow>

Weather app that features React Native, a weather API, and GPS location retrieval from your phone

CoPaw App
May 2020

<http://copaw.surge.sh/>

An internal tool that is a hybrid between an employee directory and a social networking site. Features full CRUD and authentication. This project took second place in the GAXDataDog coding Hackathon in May, 2020

EXPERIENCE

General Assembly

Software Engineering Immersive | Engineering Fellow · January 2020 to April 2020 · New York, NY

Learned full-stack web development in a 12-week full-time training program that exposed me to new frameworks

- Created The +Side, a full-stack positivity blog that alternates between personalized gratitude posts and good news articles. Features full CRUD and authentication. Back-end uses Ruby on Rails and is deployed on Heroku. Front-end uses React and is deployed on Surge
- Produced eSwap, a full-stack e-commerce site that allows users to swap items like on eBay. As the team lead on this 4 person project, this web application features full CRUD and has a fully functioning JWT authentication system. Back-end uses Express, Mongoose, and MongoDB and is deployed on Heroku. Front-end uses React and is deployed on Surge
- Designed BetterDoc, a web application that details provider information to the user based on name, location, insurances accepted, and provider specialty. Created with React and Better Doctor API. Hosted on Netlify
- Built NutriMate, a nutritional information web application and food journal. Created with HTML, CSS, Vanilla JavaScript, and Nutritionix API. Hosted on Surge

One Medical Group

Administrative Assistant · June 2016 to October 2018 · New York, NY

- Manager of day-to-day operations at a busy primary care office seeing 90 patients a day
- Performed onboarding and trained new team members
- Prioritized patient care needs when triaging urgent care patients, preparing patients for laboratory work, and assisting in billing cases
- Conducted early detection and continuity of care research targeting the health outcomes of potential cancer patients

Albert Einstein College of Medicine

Research Intern · January 2015 to October 2015 · Bronx, NY

- Worked on the New York State AIDS Institute Expanded HIV Testing Comprehensive Dynamic Trial (EHT-CDT)
- Conducted a systematic review of literature using NVivo and maintained the database using Endnotes
- Helped study team integrate key literature findings into the Comparative Effectiveness Matrix tool
- Researched policy incentives for Expanded HIV Testing
- Developed a training program and conference surrounding patient-centered outcomes research (PCOR)

EDUCATION

General Assembly · April 2020

Certificate of Completion, Software Engineering

New York University School of Global Public Health · May 2016

Master of Public Health (MPH), Community and International Health

Colorado School of Public Health · May 2014

Certificate of Completion, Public Health Sciences

Michigan State University · May 2012

Bachelor of Science (BS), Psychology

Specialization in Cognitive Science
